
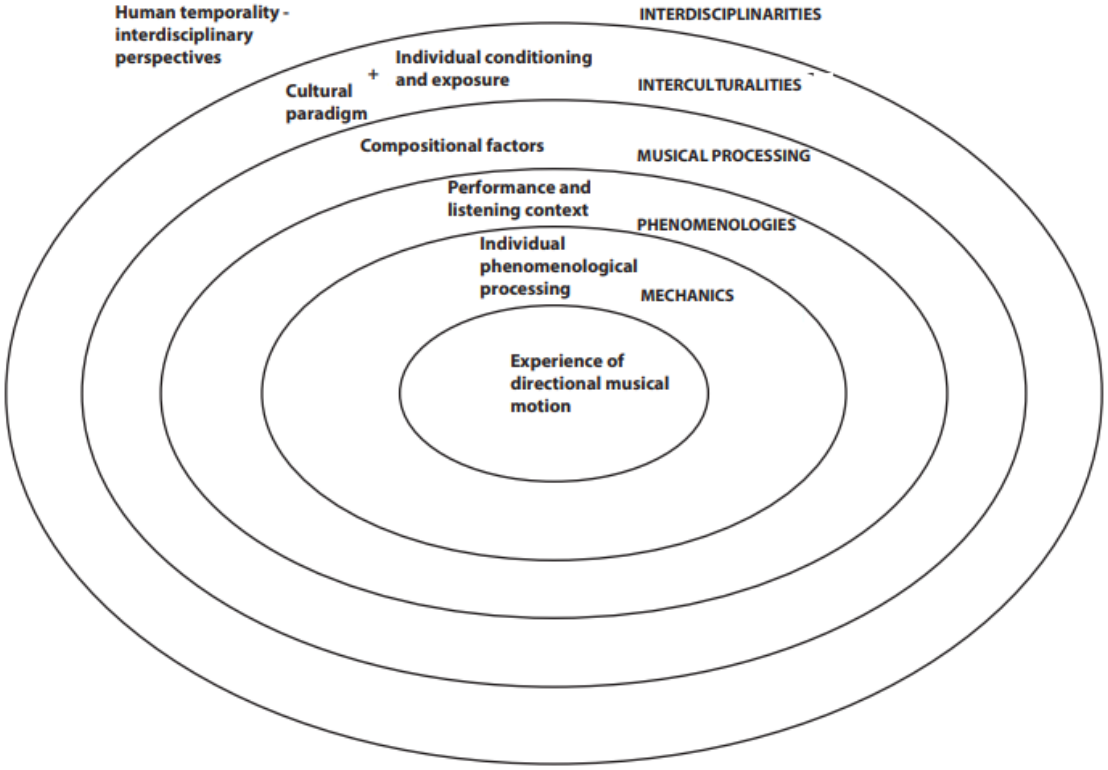
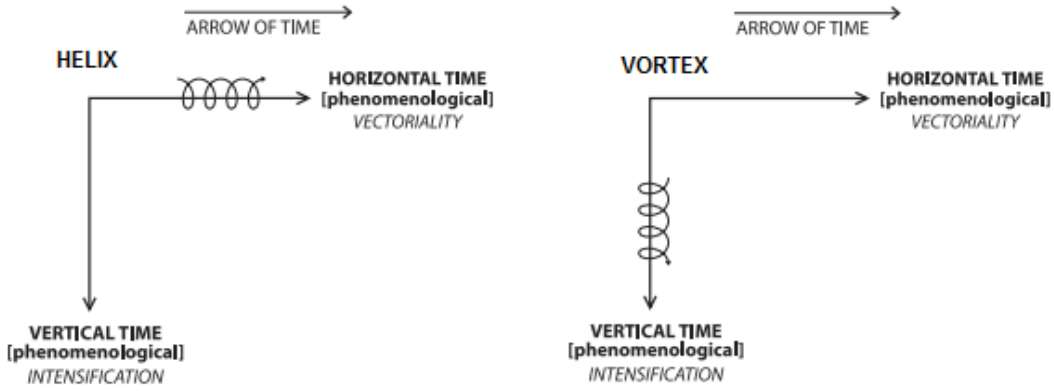
RP 1A: The experience of directional motion in music is representable as a "phenomenologically determined hierarchically organised, multi-parameter form-void vector field" — l to r: Cartesian, particle stream and phenomenological wave representations.



RP 2A: Western and Eastern musical forms (and the experience of directional motion within them) are metaphorical of their broader philosophical and cultural paradigms.



RPs 3A and 3B [paraphrased] Reflecting their respective contrasting concepts of time as linear and cyclic, Western and Eastern musical forms are representable as, respectively, *helix* and *vortex.*

Figure 1: Visual abstract — primary, secondary and tertiary research propositions 1A, 2A, 3A&3B

CHAPTER 1: INTRODUCTION

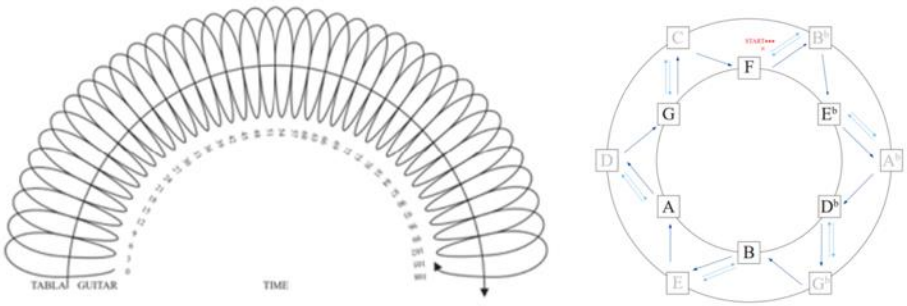


Figure 2: ***Oscillation 1***
(left) the contrasting linear and cycle global forms of the tabla and guitar; (right) equi-harmonic cycle portraying linear (short arrow) and cyclic (long arrow) modulation

BELOW: Kisho Kurokawa, Yuishikian, Tokyo, 1984, view of hearth area. With this tea room in his own home Kurokawa has re-created the Shosutei tea room by the Edo period tea master Kobori Enshu, by way of the Kan'unken tea room. A place to retreat and think (reflected in its name: the Hut of Consciousness Only), it stands in antithesis to the architect's modern study. *LEFT*: Kisho Kurokawa's study in the same apartment.

LEVEL 1: METRE:

Vector 1	At level of simple metre	3 3 4 3 3 4 4 beats
Vector 2	At level of medium compound metre	10 10 4 beats
Vector 3	At level of full compound metre	24 beats

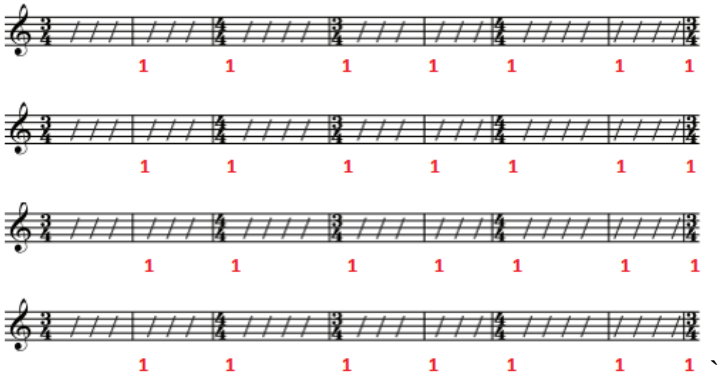

Figure 101: Metric groupings at the level of 3 + 3 + 4 + 3 + 3 - 4 + 4 beats

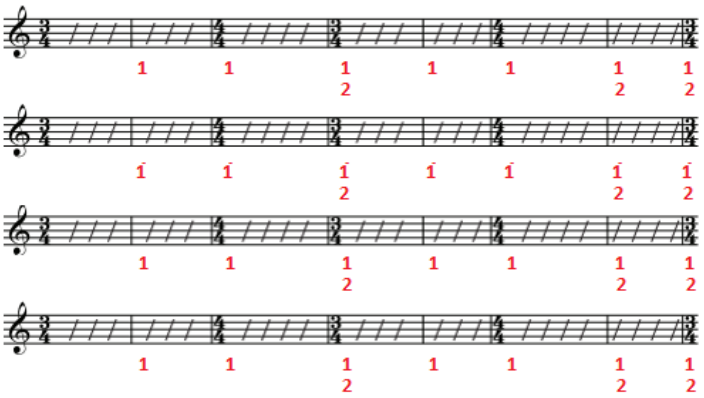

Figure 102: Metric groupings at the level of 10 + 10 + 4 beats (and 3 + 3 + 4 + 3 + 3 – 4 + 4 beats)

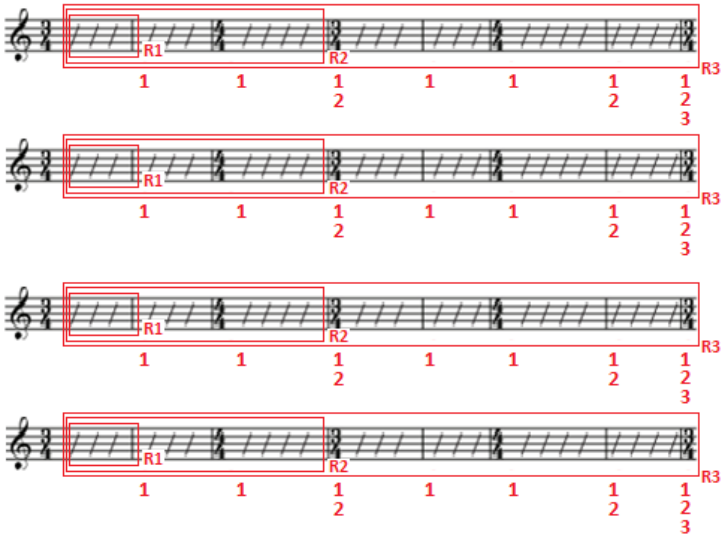

Figure 103: Metric groupings at the level of 24 beats ("R3" is 24-beat metric organisation)

Note: This figure also includes previous metric groupings R1 (3 + 3 + 4 + 3 + 3 - 4 + 4 beats) and R2 (10 + 10 + 4) beats

LEVEL 2	MELODY	
Vector 4	At level of melodic phrase 1	4 bars duration
Vector 5	At level of melodic phrase 2	5 bars duration
Vector 6	At level of melodic phrase 3	7 bars duration

Figure 104: Melodic organisation of phrases PI, P2 and P3, respectively, 4, 5 and 7 bars duration

SONG FORM

Vector 7 At level of AB Call and Response 14 bars duration

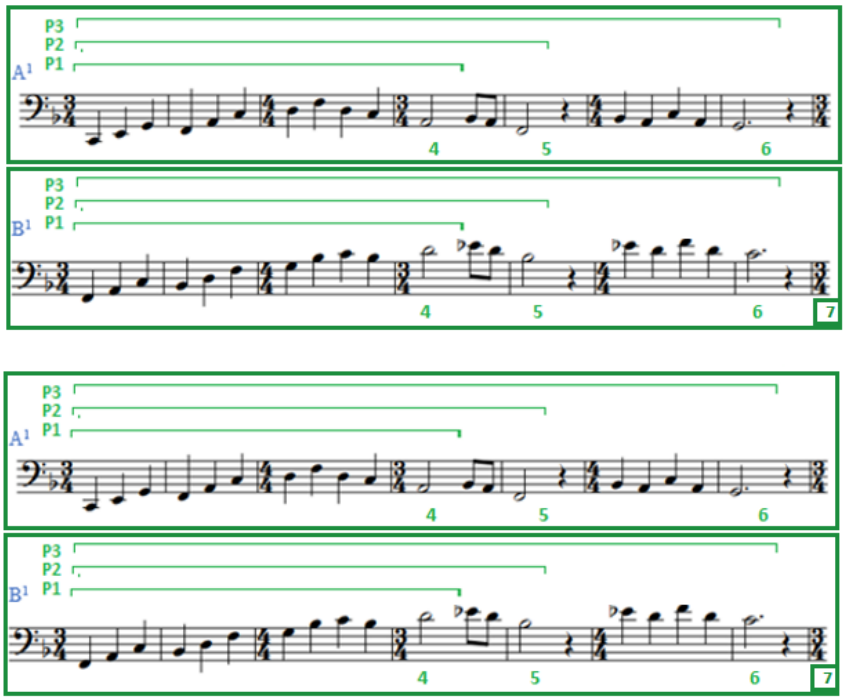

Figure 105: Melodic organisation of 14-bar melodic phrases, functioning as call and response

LEVEL 3 HARMONIC MOVEMENT WITHIN SINGLE KEY CENTRE

Vector 8 Perfect cadence 2 bars duration

Vector 9 2-5-1 progression 3 bars duration

Figure 106: Harmonic movement within a single key centre — perfect cadence

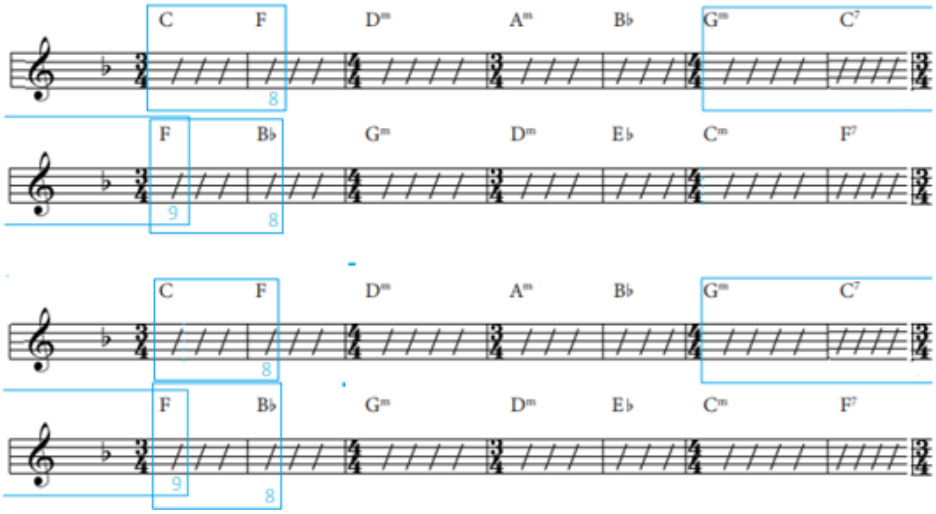

Figure 107: Harmonic movement within a single key centre — ii-V-1 harmonic progression

LEVEL 4 MODULATION

Vector 10	Linear modulation	2-bars duration
Vector 11	Cyclic modulation	3-bars duration

Figure 108: Linear modulation — bars 1 to 15

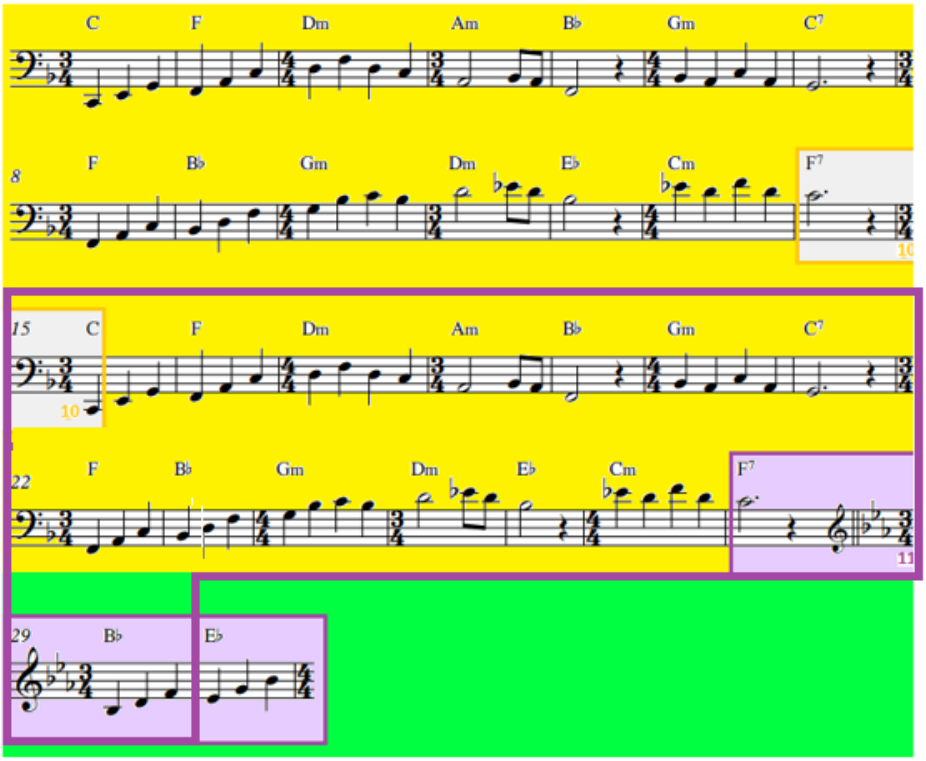

Figure 109: Cyclic modulation — bars 15 to 29

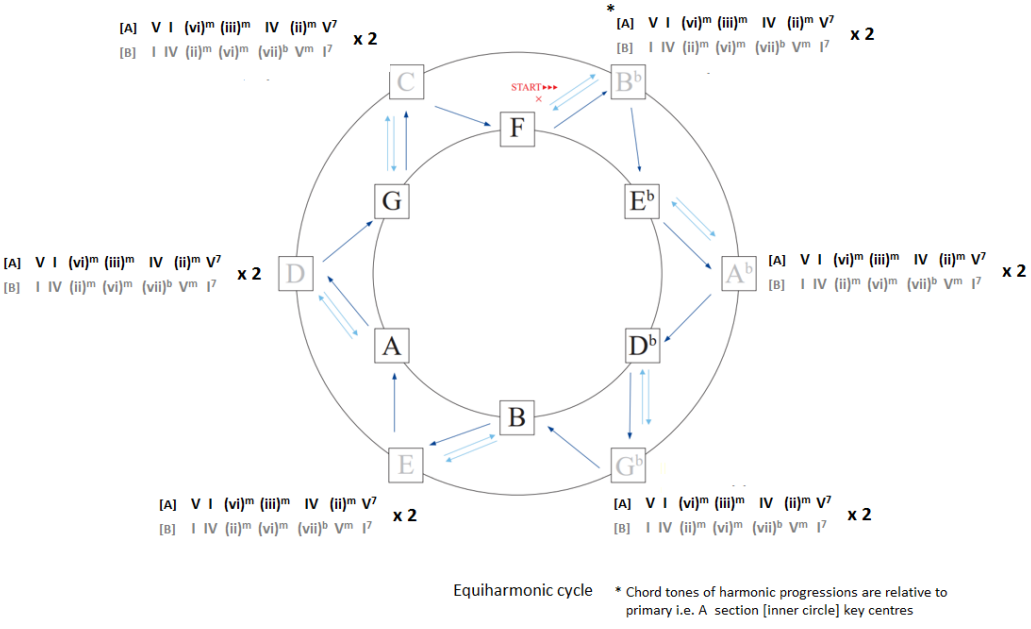

Figure 110: Combined harmonic movement within a single key centre and modulation, linear and cyclic

Note: The small parallel arrows demonstrate linear modulation and the larger arrows — between the inner and outer circles — demonstrate cyclic modulation.

LEVEL 5 GLOBAL FORM

Vector 12 Equi-harmonic Resolution 168 bars duration

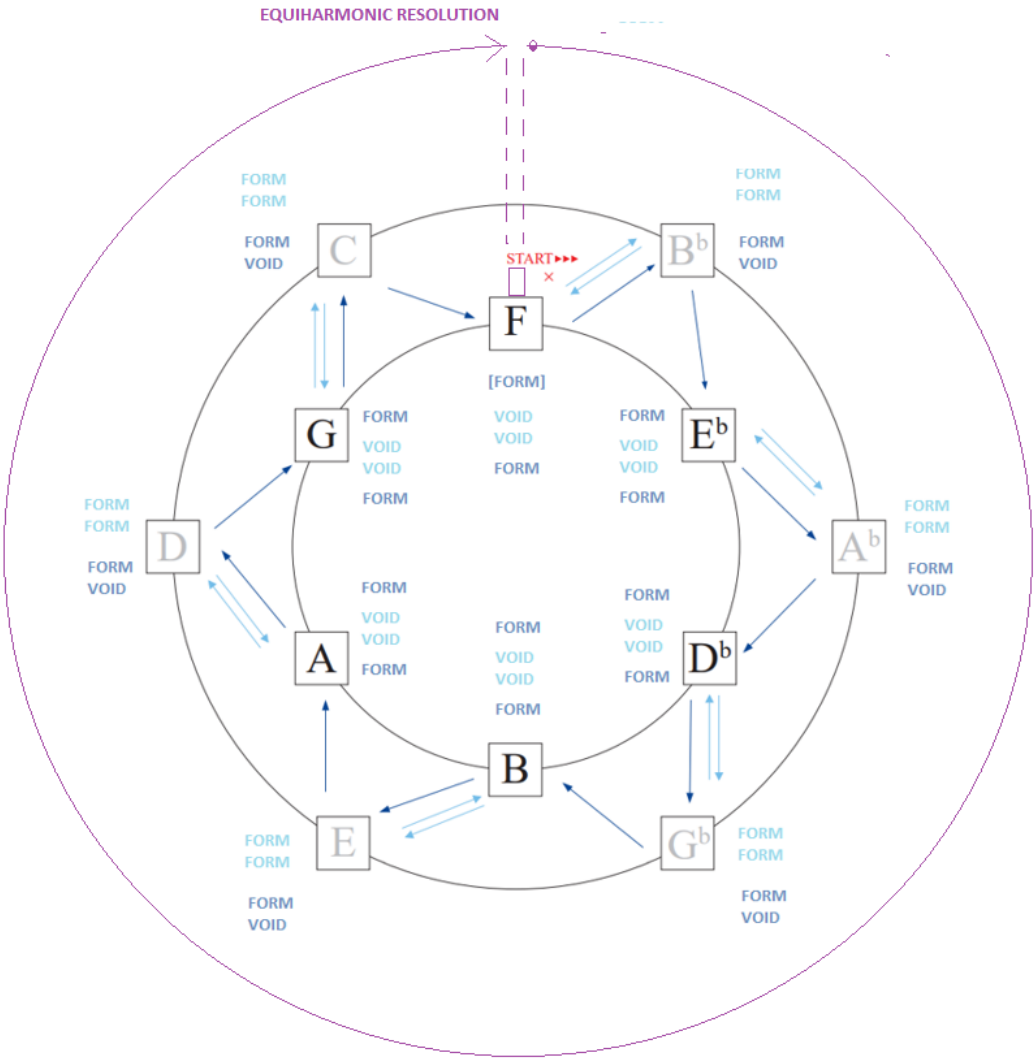

Figure 111: Form-void vectors in the equi-harmonic cycle

Vector 13 Oscillation 6048 bars duration

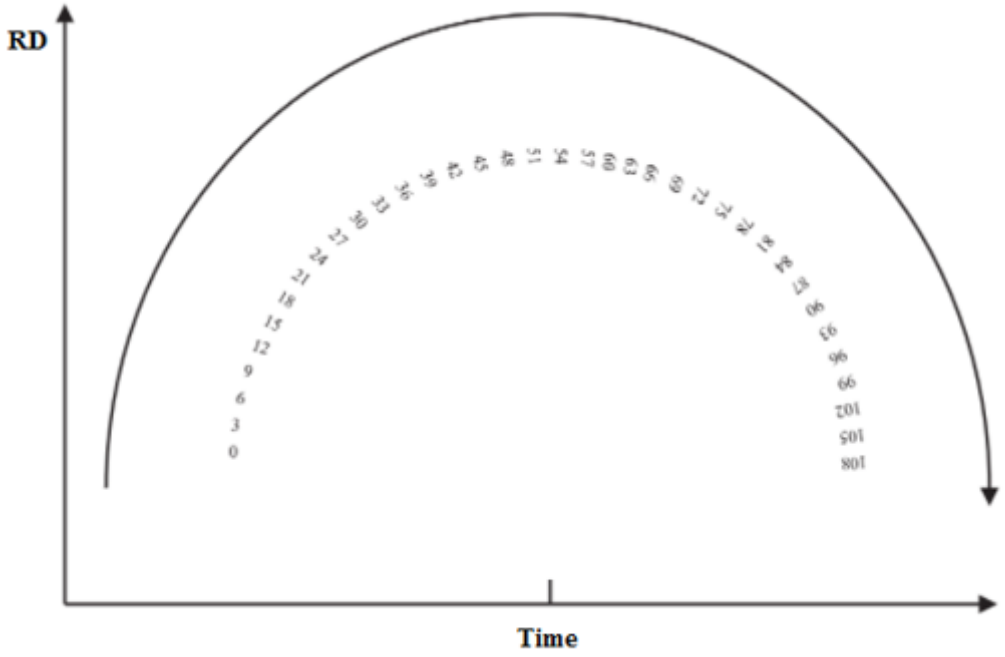

Figure 112: Linear global form of the tabla part

Note: RD is rhythmic density. Refer to section 9 of Appendix 5 for details of the compositional process.
